

Map Search Quick Guide

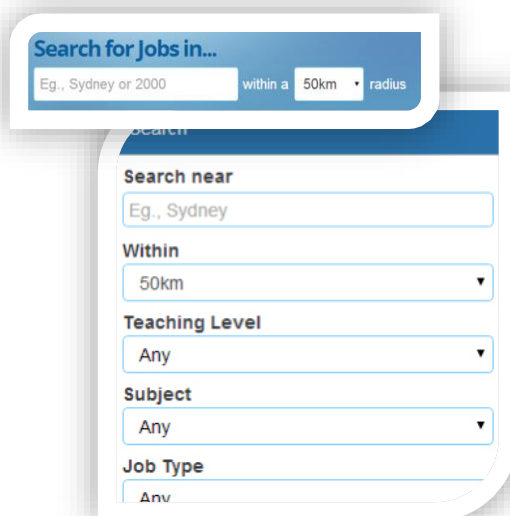

USING THE MAP TO SEARCH

Click on any state to browse all current vacancies available within that state.

You will be redirected to a map which identifies the location of the vacancies with markers. A list outlining details of these positions will appear below it.

For international vacancies, click the text beneath the map of Australia.

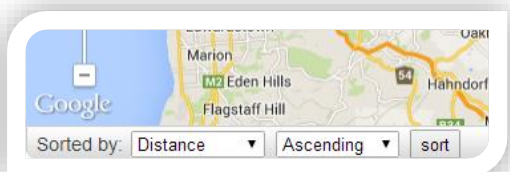

USING SELECTION CRITERIA TO SEARCH

To search for vacancies in a specific location, enter the suburb within the 'Search for Jobs in' box.

You can refine your search by selecting the subject you teach, the type of contract you're after, your teaching level, or your preference of the school's denomination.

When viewing the map, you may further adjust your selection criteria by using the options in the menu on the left of the page.

SORTING SEARCH RESULTS

At the bottom left of the map, you may sort the list of search results by job title, the date the vacancy was posted, the closing date for receipt of applications, or by school name. If you have searched for vacancies within a certain radius, you may also sort results by distance.
